

Invitation for:  
**The 4th International Research Workshop on  
Archetypes of Sustainable Development**

**February 3<sup>rd</sup> – 5<sup>th</sup>, 2021  
at the Stockholm Resilience Centre, Stockholm, Sweden**

**Objectives:** The workshop will strengthen the network of researchers and it will trace the path for future frontiers of archetype analysis in sustainability research. Specifically, it will provide a unique opportunity to:

1. Present cutting-edge research on archetypes in sustainability research (including discussing on-going Special Issues).
2. Consolidate archetypes of sustainable development to address key sustainability challenges, including land use, climate change, food systems, and biodiversity, and spark collaborative follow-up activities.
3. Define good practices and approaches to archetypes validation (collaborative paper).
4. Co-design the research agenda on archetypes of sustainability 2021-25.

**Participants:** The workshop will bring together 20-30 researchers from different fields of sustainability research. It is open to all researchers with experience and/or interest in archetype analyses.

The workshop will follow up on three successful workshops on archetypes held in Bern (2017), Berlin (2018) and Olomouc (2019). This time, the workshop will be held by the Stockholm Resilience Centre in Stockholm, Sweden, with the option of joining remotely. The workshop invites new as well as established members of the Archetypes of Sustainability network.

**Special issues:** The workshop will be a chance to present and discuss papers including, but not limited to, contributions to three ongoing special issues on archetype research.

- Archetypes of sustainable land use and governance (Environmental Research Letters, full paper deadline June 31<sup>st</sup>, 2020; Call will be published in October.
- Natural resources management and conflict in the context of sustainability transformation (*Sustainability*, full paper deadline December 30<sup>th</sup>, 2020)

- Networks of action situations in social-ecological systems research (Sustainability Science, full paper deadline May 31<sup>st</sup>, 2021)  
<https://link.springer.com/article/10.1007/s11625-020-00814-w>

**Registration is open until 31<sup>st</sup> October 2020 at this link:** <https://tinyurl.com/yxgj2d3j>

**Costs of the workshop:** The workshop is free of charge. If you intend to participate in person, you are required to cover travel and accommodation costs. We are working to secure funding to support participants with limited travel budget.

**Covid-19-note:** In case travel restrictions remain in place until the end of November 2020, due to the current pandemic, the workshop will be held fully online. We will notify the participants in due time about the final format.

We are looking forward to meeting you at the workshop!

If you have any questions, do not hesitate to contact any member of the Organizing Committee:
